

Karol Grela received his PhD degree from the *Institute of Organic Chemistry Polish Academy of Science (1998)* and did a postdoctoral research at Max-Planck-Institut für Kohlenforschung, Mülheim ad. Ruhr, Germany (2000). Next, he returned to Warsaw, and completed his Habilitation in 2003. In 2008 he was promoted to Full Professor. Since 2008, he is a Director of research group at the *Biological and Chemical Research Centre of the Faculty of Chemistry, University of Warsaw*. His research focuses on organometallic chemistry and catalysis, synthesis of natural products and valorisation of renewable resources. He published 210+ papers, 15 patent families, is the Associated Editor of the *Beilstein J. Org. Chem.*, and the Editorial Board Member of *Chemistry—A European Journal*, *Eur. J. Org. Chem.*, and consults for a number of companies.
